

Press Release

**Haadthip Reports Strong 2023 Results with 38.8% net profit growth
Continuous growth momentum with best ever result in 5 years. Fueled by
Tourism Boom and Revenue Surge**

Bangkok, March 1, 2024 – Haadthip Public Company Limited (HTC), the exclusive bottling partner of The Coca-Cola Company for the 14 Southern provinces of Thailand, proudly unveils its 2023 full-year financial outcomes, showcasing robust growth with a total revenue of 7,806.0 million baht. This marks a notable increase of 932.4 million baht or approximately 13.6 % compared to the previous year, which stood at 6,873.5 million baht. The commendable performance has resulted in a net profit margin ratio of 7.7%, reflecting an increase of 1.4 percentage points from 6.3% in 2022. The company attributes its sustained growth to the revival of Thailand's tourism sector and strategic initiatives aimed at bolstering revenue streams and operational efficiency.

Major General Patchara Rattakul, CEO of HTC, emphasized the company's alignment with the rebounding tourism industry throughout 2023. The Ministry of Tourism and Sports reported a staggering 154.4% surge in foreign tourist arrivals, totaling 28.2 million, compared to 11.1 million in 2022. Notably, according to the Bank of Thailand's statistics, Southern Thailand accounted for 42.4% of inbound tourists, outpacing the national average of 21.2%. HTC capitalized on this trend by

optimizing its packaging and distribution channels, particularly targeting single-serve formats popular in HORECA outlets and convenience stores, which collectively contributed to 46% and 19% of total sales growth, respectively. Additionally, strategic price adjustments in August 2022 and April 2023 resulted in a 6% and 1.5% average price increase, further boosting revenue streams.

Amrit Kumar Shrestha, CFO of HTC, highlighted the company's prudent cost management amidst revenue expansion. Despite a 11.2% increase in total cost of goods sold, driven by an 8.5% sales growth, HTC achieved a gross profit of 3,290.3 million baht, representing a 17.0% increase from 2022's gross profit of 2,813.1 million baht. The company's emphasis on manufacturing efficiency led to substantial reductions in overhead costs, complemented by favorable trends in packaging material prices compared to the previous year. While slight upticks in selling, general administrative expenses, financial costs, and tax expenses were observed due to broader economic conditions and strategic investments, HTC closed 2023 with a net profit of 598.0 million baht, marking a 167.1 million baht increase from the previous year, or a 38.8% rise. Consequently, the net profit margin ratio for 2023 stood at 7.7%, signaling a 1.4 percentage point improvement from the prior year.

The impressive 2023 results underscore HTC's resilience and strategic foresight amid evolving market dynamics. As the company looks ahead, it remains committed to driving sustainable growth, fostering strategic partnerships, and delivering value to its stakeholders.
