Manual Import Email backup for Exchange profile Via Microsoft Outlook

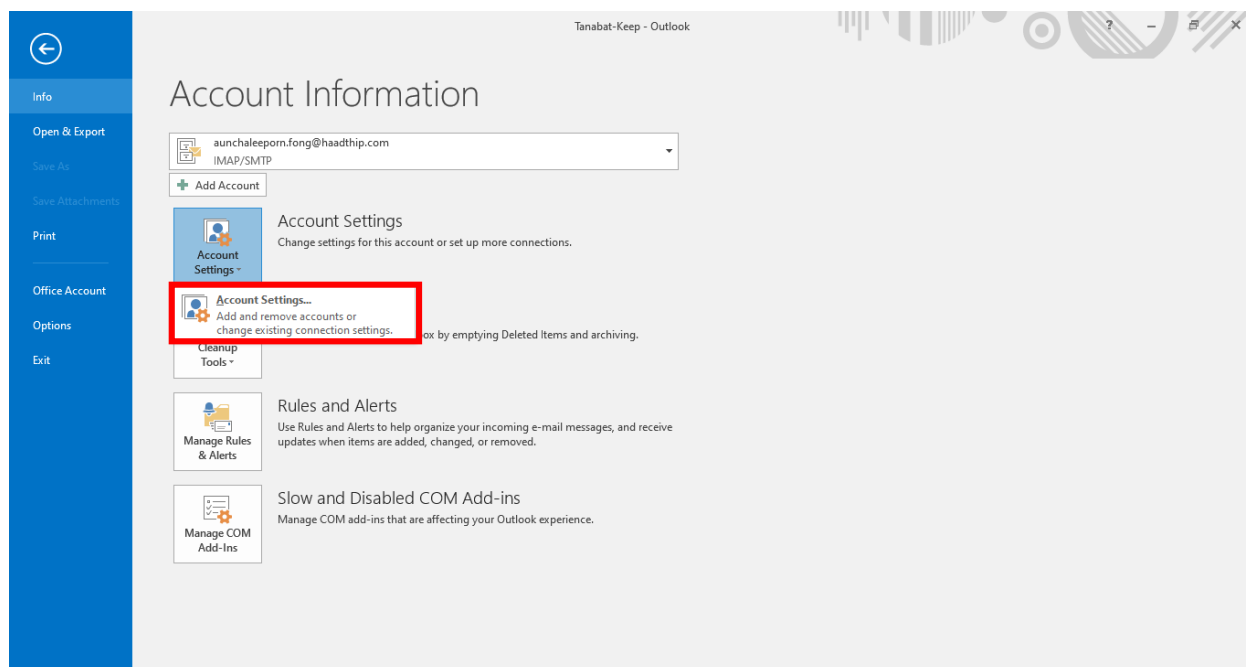

1. Open Microsoft Outlook Via Outlook profile

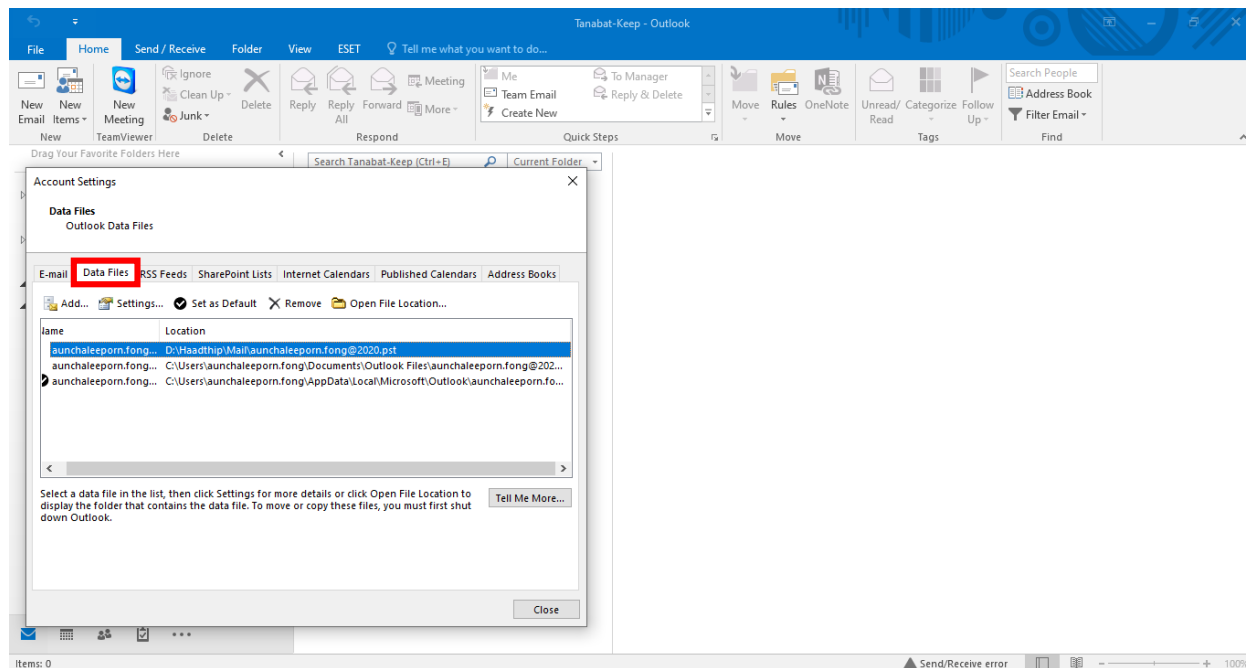

1.1) Choose the **File** tabs in the ribbon > **Info** > **Account Settings**

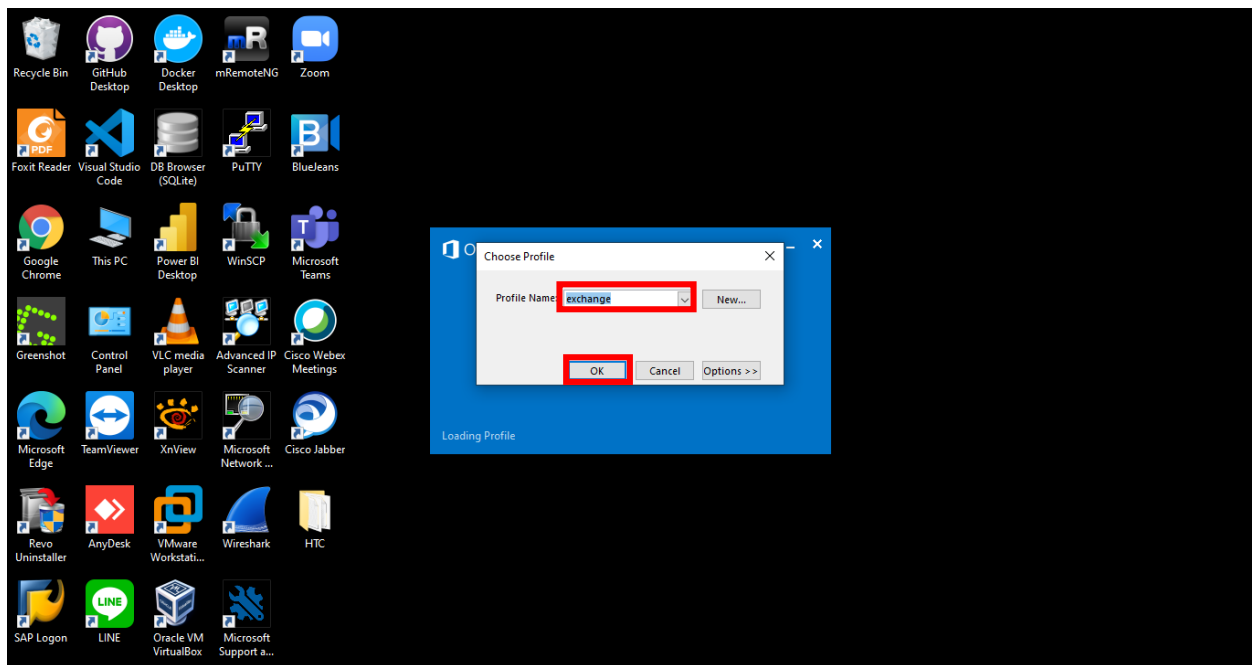

1.2) Choose **Account Settings...**

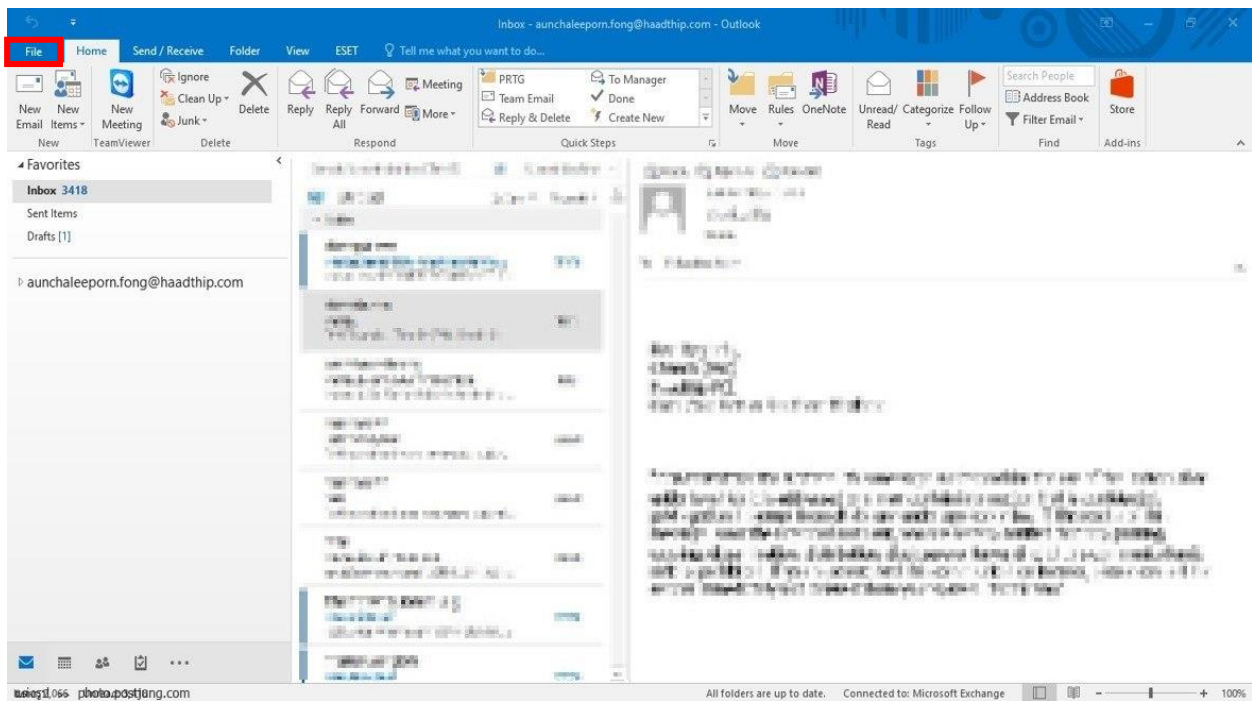

1.3) Choose the **Data files** tabs. If you have an existing backup file you would like to add, navigate to the file location where file resides, then select the file.

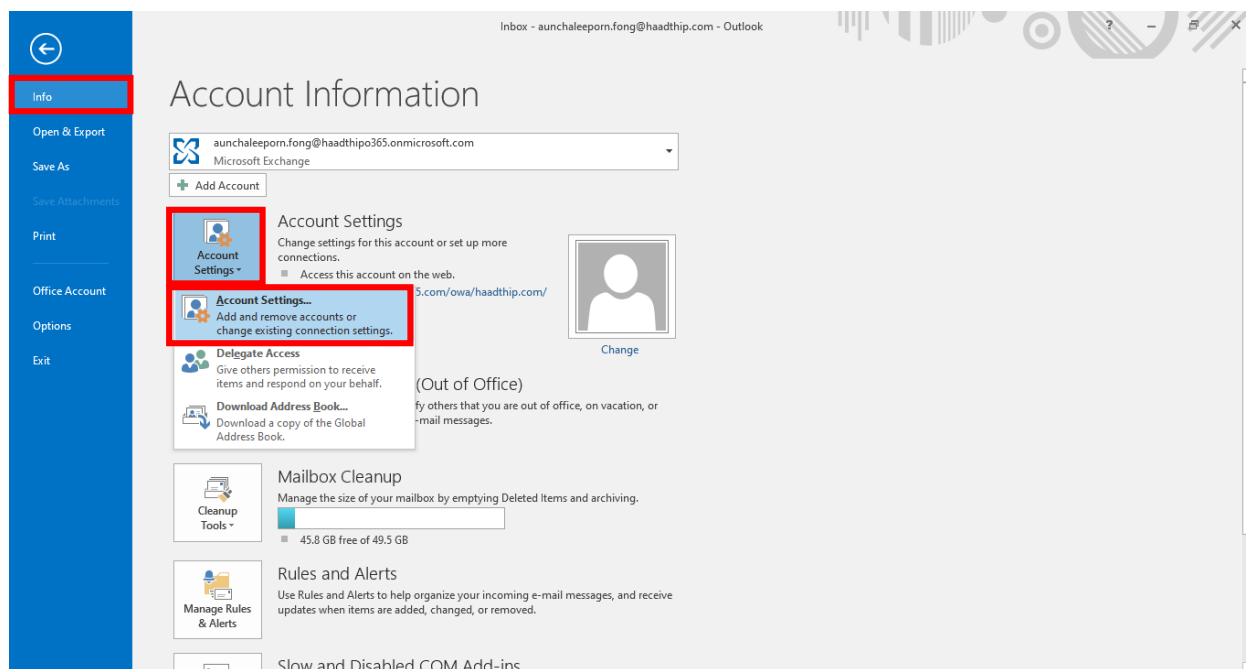

2. Close Microsoft Outlook Via Outlook profile, and open Microsoft Outlook Via exchange profile > OK

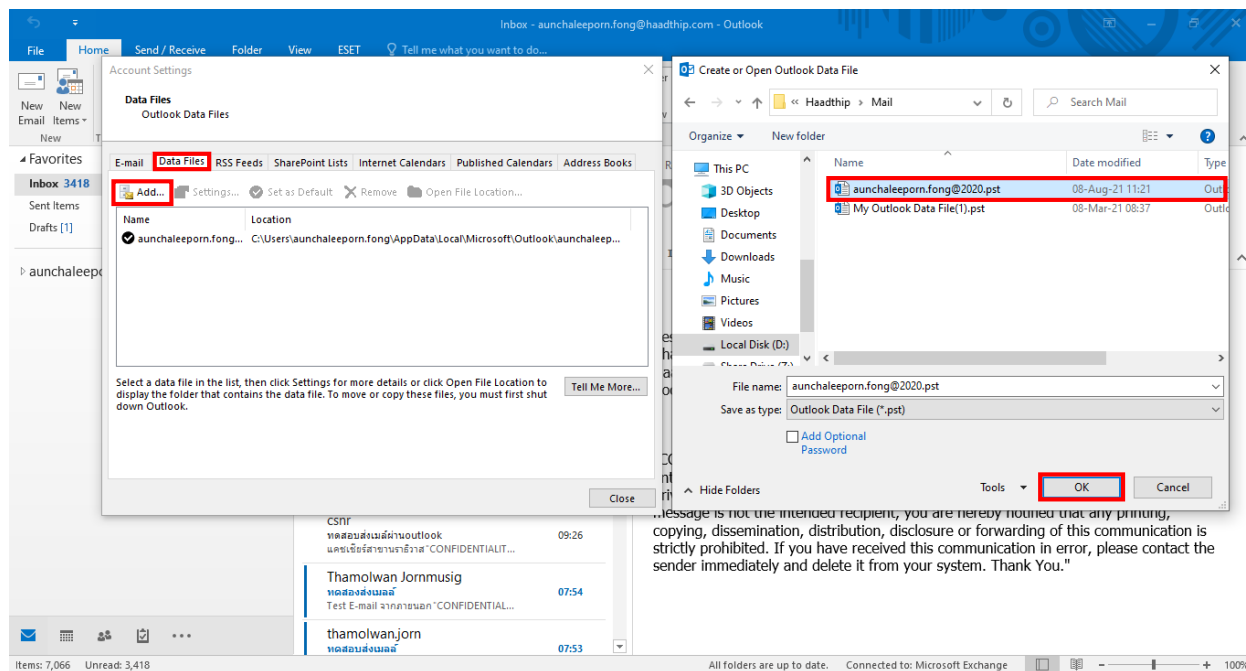

- 2.1) Choose the **File** tabs in the ribbon

2.2) Choose the **Info** tabs > **Account Settings** > **Account Setting...**

2.3) Choose the **Data files** tabs > Add ... (Navigate to the location where you PST resides, then select the file) > OK

2.4) Finish adding information.
