The 2024 Shareholders' General Meeting of HaadThip Public Company Limited. hosted by Miss. Thanarat Jaroenrat, was started at 14:00 hrs. The Meeting is Hybrid Meeting (physical and electronic meeting), held and broadcasted from Fuji1, 4th floor, Hotel Nikko Bangkok, 27 Soi Sukhumvit 55 (Thonglor), Klongtan Nua, Wattana, Bangkok 10110 which the electronic meeting will be in accordance with Security Standards for Meetings via Electronic Media B.E. 2563 and Notification of Ministry of Digital Economy and Society RE: Standards for Maintaining Security of Meetings via Electronic Means B.E. 2563 (2020) which the Company has the expertise meeting organizer certified by related sectors. Moreover, the Company has legal consultant to inspect vote counting and oversee transparency, legal and company regulation compliance and good corporate governance of the meeting transparently.

Miss. Thanarat Jaroenrat informed the meeting that the Company collects, uses and reviews personal information, voice and motion pictures of meeting attendees to record and prepare the minutes of meeting, meeting management and etc. Moreover, the Company recorded video to broadcast on website.

The procedures of the meeting which was dispatched to the shareholders in advance and have the regulations of voting, vote counting and question and opinion procedure as follows:

The meeting will consider agendas in order in accordance with the invitation letter, present information for each agenda and then give an opportunity for shareholders to ask questions before voting. The voting results will be announced to the meeting after vote counting of each agenda is completed.

For the shareholders who physically attend the meeting

1. Shareholders and proxies will receive ballot with barcodes at the registration before attending the meeting.
2. Shareholders who don't receive ballot at the registration are shareholders who already casted votes in proxy form.
The company will count vote according to proxy form.
3. In case, any shareholder would like to ask question or express opinion in the meeting, please raise your hand and when chairman allows, please inform name-surname and status (shareholder or proxy) or write question on the paper and give to staff. The company will answer in the meeting only related to the agenda.
4. In case, shareholder or proxy would like to vote "disapprove" or "abstain", please vote on ballot and raise your hand. Staff will collect the ballot and record the vote.
5. In case, shareholder votes "approve" or "abstain", please clearly mark. Void ballot is when the shareholder or proxy does not clearly mark on ballot such as voting for more than one choice or separating shares to vote (excepting custodian) or revising the vote without signing.
6. In case, shareholder or proxy would like to leave before the meeting completion, must give ballots to staff for the record of vote base.

For the shareholders who attend the meeting via electronic means (E-AGM)

MC presents video to explain the procedures of asking question, giving opinion and voting.

MC will announce voting results which each agenda will use the latest total shares of shareholders who attended the meeting. The resolution will be according to follows;

- Agendas 1, 3, 4, 5 and 7 shall be resolved for approval by the majority votes of the shareholders attending the Meeting and casting votes.
- Agenda 2 shall be acknowledged, not resolved.
- Agenda 6 shall be given at least two-third of the total votes of shareholders attending the Meeting and having the right to vote.

The Company allowed the shareholders to use the rights to propose agenda for the Annual General Meeting of Shareholders for 2023 in advance from November 1, 2023 to December 31, 2023, and no shareholders proposed agenda.

MC informed the Meeting of Privacy Notice, as shown in the Personal Information Protection Act B.E. 2562, the objectives and necessity of personal information collection of are to comply with laws, with reference to Public Company Law, Securities and Stock Market Law, E-Meeting Act and related announcements. The Company shall prepare registers for shareholders and collect and record sounds or both pictures and sounds of all the participants throughout the Meeting, including information, usernames, passwords, dates of the Meeting, starting and ending time of the Meeting, shareholders' IP address information for disclosure and processing of shareholders' and/or proxy holders' personal information for the 2024 Shareholders' General Meeting via Electronic Media (E-AGM). Relevant documents, processing, voting for resolution, and any matter related to the Shareholders' Meeting that include the shareholders' and/or proxy holders' personal information. The Company would like to inform that we will keep and disclose such information, as specified by laws, taking into account privacy protection and personal information at most.

HaadThip is determined to help reduce global warming and greenhouse gas by participating in the Care the Bear Project of the Stock Exchange of Thailand. Therefore, at this online meeting, we would like to invite the Board of Directors, the executives, the shareholders, the proxy holders and all related persons to be part of this project by scanning the QR Code as shown and give short answers to the questions, so that the information obtained will be calculated and processed for your knowledge at the last part of the Meeting, revealing the amount of carbon footprint that can be reduced by this project.

MC informed that record date for the Annual General Meeting of shareholders for 2024 was March 18, 2024. 77 shareholders attended the Meeting in person and 68 proxy holders. Therefore, 145 shareholders and proxy holders attended the Meeting, holding 280,784,289 shares in total, accounting for 69.8605%. The number of attendees was adequate for constituting a quorum, as specified in Public Act law No. 103 and the Company's regulation No. 45. (stating that at least 25 shareholders and proxy holders (if any) or at least half of the total shareholders are required to attend each Shareholders' Meeting. Also, to constitute a quorum, at least one-third of the total count of sold-off shares is required.

After that, the host asked Gen. Charan Kullavanijaya, Independent Director/Chairman, to chair the Meeting and open the 2024 Shareholders' Annual Regular Meeting in form of hybrid meeting

The Chairman welcomed the participants opened the Meeting, consisting of 9 agendas, and proposed different matters to be considered by the Meeting in order of the agendas as follows:

Agenda 1 **To adopt the Minutes of the Extraordinary General Meeting of Shareholders No.1/2023**

The Chairman presented the copy of Minutes of the Extraordinary General Meeting of Shareholders No.1/2023 held on Wednesday, August 23, 2023 and asked the Meeting to adopt the copies of the minutes, which had been dispatched to the shareholders along with the invitation letters in the attachment No. 3.

The Board of Directors agreed to propose the minutes of the Extraordinary General Meeting of Shareholders No.1/2023 which the Board of Directors expressed the opinion that the minutes had been recorded correctly to the shareholders' meeting to adopt. The details are shown in the attachment No. 3.

After that, the Chairman allowed the shareholders to ask question. Since none of the shareholders sent any queries at this agenda, the Chairman asked the Meeting to consider voting.

After consideration, the Meeting resolved to adopt the minutes of the Extraordinary General Meeting of Shareholders No.1/2023 held on Tuesday, Wednesday 23, 2023 with majority votes of the shareholders who attend the meeting and cast their votes as follows:

Resolutions of the Meeting	Number of Votes	Percentage
Agree	281,647,924	100.0000
Disagree	0	0.0000
Abstain from Voting	0	-
Spoilt Votes	0	0.0000
Total	281,647,924	-

N.B.: At this agenda, another 26 shareholders attended the Meeting, holding 863,635 shares in total. Therefore, this meeting was attended by 171 shareholders, holding 281,647,924 shares.

Agenda 2 To acknowledge the Board of Directors' Reports on the 2023 Operation Results

Gen. Charan Kullavanijaya reported to the Meeting that the Company's performance for 2023 was concluded as details in 2023 One Report, dispatched to the shareholders in form of QR code along with the invitation letters in the attachment No. 3.

The Chairman addressed Haad Thip's anti-corruption policy, emphasizing that Haad Thip Public Company Limited and its subsidiaries are committed to conducting business with honesty, transparency, and strict compliance with the law, ethics, and principles of good corporate governance.

Since 2013, Haad Thip has been a member of the Private Sector Anti-Corruption Coalition (CAC) for over 11 years, demonstrating a long-standing commitment to anti-corruption policies and ethical business practices at all levels. Corruption remains a persistent challenge, and in the previous year, Haad Thip took proactive steps by inviting business partners to join the "Change Agent" project, fostering a transparent business network. Additionally, the Company continued to implement the "No Gift Policy" during all festive occasions. From the 2023 operations, no incidents of corruption or unethical activities were found.

The Chairman then invited Maj. Gen. Patchara Rattakul, Director / Chief Executive Officer, to present the 2023 operational results to the meeting.

Maj. Gen. Patchara Rattakul welcomed the shareholders and reflected on the Company's performance in 2023, highlighting the challenges and obstacles encountered throughout the year. 2023 was a year of continued recovery from the COVID-19 pandemic. While many aspects of our business have undergone significant transformation, some have returned to their previous state. This ever-evolving landscape requires us to remain agile and continuously adapt to changes.

2023 Summary and Achievement

- Financial Results
 - Revenue Growth for more than 14% (Target 6-8%) as a result of Revenue Growth Management and partly price increase
 - Gross profit margin for more than 40% which is high level comparing with other bottlers around the world
 - D/E ratio was less than 1 time. It is in good level representing that the debt is not be worried even though the Company continued to invest.
- Capacity Expansion
 - PET Line 3 commercial operation in March 2023 at Suratthani plant
 - Utilization rate at 64% for all PET production lines at Suratthani plant
 - New Injection Machine with faster technology which is the 3rd injection machine
- Products and Market Execution
 - 4.4 Million serving/day (1 serving is 8 oz bottle)
 - 5 Zero-sugar products were launched in accordance with the strategy to increase choices for no sugar consumers
 - 1 New Brand : OOHA in accordance with the strategy for non-alcohol beverage producer and OOHA has been sold for more than a year.
 - In general, there were approximately 50,000 outlets which have continued their transactions with us.
- ESG
 - The Company launched Recycled PET operation in collaboration with Thai Namthip Co., Ltd., which is to take recycled plastic pellets and turn them into new packaging, starting with 1 liter packages, and the plan is to start using more and more Recycled PET in order to reduce the impact on the environment. Recycled plastic pellets are 30-40% more expensive than new plastic pellets, but that has not discouraged us from taking action on sustainability.
 - CG Corporate Governance rating with Excellent
 - SET ESG with AA rating
 - Collective Action Against Corruption (CAC) advocate : Change Agent
- 2024 Awards

The aim of Hatthip is not only to create sustainable profit for our stakeholders. We are committed to improving the quality of life for our people in every community where we work with every chance we can within our potential. We

believe that we are where we are today because of society. Therefore, it is our direct duty, not indirect, to develop the community for the better while we are performing our duties.

Environment: we are very conscious of this because we use a lot of sugar and a lot of water, and we release a lot of plastic into society. Consequently, we realize that we have to be one of the leaders who have to help solve this problem for the country. Last year, we talked to all our sugar suppliers. We have to work together to find a solution to get fresh sugar, not burnt sugar. Even though we are a small company, we are determined to be a voice for the people. As I have mentioned, we use a lot of those resources, so we have received cooperation from sugar factories. We are doing everything that can reduce or make farmers aware not to burn sugar cane. We will continue to inform you.

Human rights and equality: Many companies considered its importance. We would like to state that it is urgent priority. We look at people based on their performance, not their gender, religion, or race. We look at people as human beings. We are all equal in promoting gender equality. We have continued to participate in woman empowerment.

- The Excellent Award for CG score rating
- SET ESG with AA rating for 6 consecutive years from 2018-2023
- ESG 100 for 4 years (2017, 2020-2023)
- Received the Human Rights Model Organization Award for 3 consecutive years from 2020-2023
- Change Agent in 2023

PET Line 3 (Punpin, Surat Thani)

The newly expanded plant in the picture (at Punpin District, Surat Thani Province) has 3 PET production lines, all of which are from Germany, and 1 line is can packaging production line. Within the fourth quarter of 2024, the company will receive another 1 production line, a glass bottle production machine for both returnable and non-returnable bottles. The main machinery in this plant is the plastic pellet injection machine, of which today we have 3. Therefore, the plant in Punpin has 5 production lines in total. The latest machine (PET production line 3) has a production speed of 1,000 bottles per minute, which is considered high and very fast technology. The plastic injection machine uses the same modern technology. We currently have 1 PET production line at Hatyai plant, but it is no longer in use. There are 2 glass bottle production lines in total. We plan to close Hatyai plant to avoid redundancy and increase efficiency in cost management. After we install the glass bottle production line (at Phunphin) in the 4th quarter, the Hatyai plant will be closed and become a large distribution center.

2023 New Products

New and reformulated products: The first product is the Fanta - new orange formula. The second product is Coke Creation, which you may have seen for the past 2 years. We call it, in and out product. It is a Coke with flavors and creates impact in the market. The next is about K-pop. It is minute maid, a new formula with vitamin C. The next is Fanta WTF (What the Fruit), which we ask consumers, especially young consumers, to guess what flavor it is. The new brand is OOHA with two flavors: OOHA Lychee Yogurt Flavored Soda and OOHA Lemon and Sea Salt Zero Sugar Sod. Schweppes is another brand that has seen high

growth post-COVID. Their new flavor, lemon soda, has been well received. Lastly, there is Fanta Red Lime Soda, which have been advertised at the moment.

Recycled PET

Now it is not cost-effective yet. I would like to inform you that it is 40% more expensive than new PET bottles. However, we use more than 10,000 tons of plastic per year. Regardless of the cost, we need to use more recycled PET.

Driving Sustainability

- Packaging Management: We have a commitment with Coca-Cola that by 2030 we will collect back 100% of the plastic waste that we sell to the market.
- Water Resource Management: The target for 2025 is to expand the number of beneficiaries to more than 10,000 households.
- Energy Management and Climate Change: The 2030 target is to increase the proportion of clean energy for electricity production to not less than 20%. The 2050 target aims to be an organization with net zero greenhouse gas emissions.
- Human resource development: The 2025 target is to increase the proportion of manager level-female employees by 5%. We have measurable goals. For all of this, we must use a budget that is appropriate for our capabilities to achieve.

Non-Alcoholic Ready to Drink (NARTD) in South in 2023

The market value of Non-Alcoholic Ready to Drink (NARTD) products in Southern Thailand increased by 15.3%, compared with that of the previous year. Comparing with other areas in Thailand, South is better recovery. The market value of Non-Alcoholic Ready to Drink (NARTD) products in Thailand increased by 11.4%. Soft drink grew by 17.5%. Juice and packaged water grew by 15.8% and 21.2%, respectively. Our business operates on a lot of tourism areas. When the tourism industry recovers, it has a positive impact on the recovery of our business. And when there is a crisis, we will have more negative impact than other areas in Thailand.

The Company maintained market share level of NARTD at 24.9%. Market share of soft drink was at 79.3%, and market share of packaged water was 7.2%.

Key Results in 2023

The sale of the Company was Baht 69.8 million cases, an increase of 8.5% from 2022: 66.2 million cases sold to our customers and 3.6 million cases sold to Thai Namthip Co., Ltd. The market share of soft drink products in the southern region was at 79.3% whereas that of the Non-Alcoholic ready to Drink (NARTD) products was at 24.9%, compared with that of the previous year. The market share of Namthip drinking water was at 7.2%. The competition in this type of beverage is heavy and often involves price competition. This is another issue we have to improve.

It is necessary to increase sales of no sugar product to meet consumer demands due to changing consumer behavior. Previously, sales of no-sugar products was accounted for 3.1 % of total sales, an increase by 31%. Our plan for future is to have no sugar product to be accounted for more than 10 % of total sales. Convenience store distribution channel grew by 19% and HORECA distribution channel grew by 46%. We believe that coolers will increase our sales. In 2023, we increased coolers by 19% or 2,700 coolers and invested approximately 40 million Baht. Currently we have 16,000 coolers in the market. If we look the penetration or the number per population, compared to Thailand, we are still lower than that, at about 16 coolers per 10,000 people. However, this matter must be weighed carefully because it is a high investment. At the same time, if we can control the freezing, it will create excellent sales for us.

Mr. Amrit Kumar Shrestha, Chief Financial Officer (CFO), gave additional details as follows:

The 2023 Financial Performance

The sale grew by 9%, consisting of an 6% increase in sale in the southern region and a 112% increase in made-to-order sale of products for Thai Namthip Co., Ltd.. The sales revenue of group increased by 14%, comparing with previous year. Compared to 2022, which was impacted by price mix for 5% as a result of a 6% price increase in August 2022 and a 1.5% price increase in April 2023. Consequently, revenue growth is more than sales volume growth.

We controlled cost of goods sold sales and increase production efficiency. Consequently, gross profit increased by 17%, which is more than an increase of revenue from sales. which is higher than sales revenue. SG&A Expenses increased by 15%, which is higher than an increase of revenue because of 3 main factors; 1. Sales promotion and marketing expenses, especially in sales channels that grew higher than other channels, such as convenience store channel and other sales channels, which invested more and more frequently in sales promotion than other channels and traditional channels. 2. Employees expenses which was in accordance to market and employee plan 3. One time expenses : asset impairment : unused machines for approximately Baht 10 million.

Finance expenses include interest expenses increased by Baht 5 million as a result of Baht 280 million long-term borrowings for CAPEX project for our 3rd PET production line. The long-term borrowings was Baht 1 billion less than total investment in 2022 , and in 2023m the remaining project investment will be from cash from operations, resulting in significantly lower borrowings than expected.

Tax expense increased by 29% in accordance with the profit growth. Net profit was Baht 598 million, an increase of 39%. Moreover, we can see the expansion of gross profit and EBITDA.

Revenue increased more than sales volume because of our revenue growth management and an increase of product prices in second half of 2022 which we will fully receive impact in 2023. Gross profit margin increased by 7%, lower than an increase of revenue due to an increase of raw material price such as resin and can.

The selling, general and administrative (SG&A) expenses decreased by 16%, due to 4 factors, 1. An increase of expense in sales promotion and marketing, especially in growing sales channels such as convenient stores, coffee shops, hotels and restaurants which resumed to be normal after Covid-19. 2. Transportation cost increased from higher fuel price 3. Personnel expense due to minimum wage policy in 2022 and an increase of employee's wage because of the growth of the Company. 4. One-time expense of dissolution of 3 subsidiaries which will cease their operations in 2023. Consequently, we had to record expense from impairment of assets.

The earnings before interest, tax, depreciation and amortization (EBITDA) decreased by 13%. The interest expenses decreased by 27% due to payment of long-term debt. Tax expense had no change. The net profit was decreased by 19% due to low gross profit margin and selling, general and administrative (SG&A) expenses as a result of net profit decrease due to one-time expense from subsidiaries' dissolution. Without one-time expense, net profit decreased by 15%.

Financial Highlights – Balance Sheet & Cash Flows:

From the Balance Sheet, Assets increased by Baht 570 million due to the investment in plant ,equipment for new PET machine. For Cash Flows, and other non-current asset. Debt increased as a result from loans, which is mainly a long-term loan for Baht 280 million.

We maintained cash flow at a good level. Cash flow from operating activities was Baht 1,205 million. Cash flow from investing activities was Baht 804 million. Cash flow from financing activities was Baht 467 million. Cash at the end of 2022 was Baht 98 million.

Financial Highlights – Key Ratios:

Overall ratios were at a good level. The Return on Asset (ROA) rate was 12.3 %, whereas the return on Equity (ROE) rate was 15.9%. The debt to equity (D/E) ratio was at a good level at 0.65 time, whereas the interest-bearing debt to equity (IBD/E) rate was 0.18 time. Activities Ratio maintained in good level. Cash Cycle was 28.5 days. Average Inventory Period was 28.5 days. Average Collection Period was 26.7 days, decreasing from 28.8 days in 2022. Average Payment period was 28.3 days. Interest Coverage was in good level at 60 time. Overall financial number in 2023 were good.

Maj. Gen. Patchara Rattakul, Director/CEO reported to the meeting as follows;

10-Year Growth Vision

We aim to be a Total Beverage Company as we want to expand our business into other types of beverages. NARTD's market share in 2027 aims to be 30% and 35% in 2032. We can see that revenue in 2023 grows by 14%from the target of 6-8 %. Sales volume in 2023 grew by 9 % from the target of 3-5%. We expect that in 2027 we will generate revenue of approximately Baht 11 billion or sales of approximately 90 MUC. In 2032, we will generate revenue of approximately baht 15 billion or sales of approximately 120 MUC. To achieve these goals, first of all we must maintain our leadership in the soft drink market in the South,

with a market share of more than 80 percent, and we must expand our business in non-carbonated beverages, both in type and brand. We must increase our production and operational efficiency to reduce costs and manage revenue better.

Continuing Business Momentum in 2024

We will continue to support business growth with the following main focus areas:

- Revenue Growth Drivers
 - Higher growth in Immediate Consumption Pack of 10%
 - Zero Sugar volume growth through distribution and innovation for 43%
 - Zero Sugar contribution comparing to total portfolio at 4.5%
 - Improve & maintain SSD Market Share at 80% and no price war
- Products & Market Executions
 - Develop or improve returnable glass bottle packaging by investing. The new machinery can produce glass bottles for both carbonated and non-carbonated drinks such as tea, drinking water, mineral water, etc.
 - New products: We and Coca-Cola will work together. We will find marketing measures to increase drinking. It depends on creating demand through marketing strategies. The Southern consumers are at 134 units per person per year. If we compare with others in other regions, it is at 111 units per person per year. But we will not stop reaching our goal.
 - Increase distribution
 - Increase in coolers by 20-25 %to increase cooler penetration per capita
 - Increase outlets to more than 50,000 outlets
 - Digital Enhancement
 - Increasing digital footprint
 - Expanding e-commerce opportunities
 - 2024 target
 - Sales volume grows by 4-6 %
 - Revenue grows by 6-8 %
 - Gross profit margin is more than 40 %, despite the pressure on costs of packaging and cost of sugar that has increased by 4 baht per kilogram. We must do everything to get through this situation to reach our target.

Glass Business Investment

The company has invested Baht 800 million, including machinery and related utilities, with a production capacity of 800 bottles per minute. When we distribute more glass bottles, we will be able to reduce our price sensitivity more because glass bottles can be reused over and over again because we design the labels to be paper. When we repackage the bottles, the products will always look new.

The proportion of income from glass bottle products is currently 2-3 %. The goal is to achieve 10 % in the next 5 years. In terms of the market, we have an advantage over our competitors because it is a trade obstacle. It is not like you can invest and do it. Logistics to distribute products must be sold and received back, giving us an advantage over our competitors.

Production will start in Q4 2024. We will launch new products from this machine, such as juices and mineral water. For Sustainability reason, Glass bottles are environmentally friendly. Our area has more than 200 islands. This will allow us to help with marine litter issue.

I would like to present VTR.

The Chairman allowed the shareholders to ask question.

Mr. Sittichok Boonwanich, Shareholder, commented and asked 4 questions. Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question 1 I visited the South, specifically the Trang branch, and found it clean and tidy. The security guards were doing an excellent job. During my trip to Koh Mook, I thought of proposing a project where islands could implement recycling programs. For example, waste could be weighed by the kilogram to track how much is collected annually, preventing it from being thrown into the ocean. How many islands do we operate on? How much waste do we collect? This could even contribute to carbon credits.

Answer Thank you very much for raising this point. We have already initiated several projects, such as assisting villagers with marine waste management on Koh Yao Yai. However, removing waste from islands is quite costly. The challenge lies in creating an efficient and sustainable system for transporting waste from the islands to the mainland for incineration or recycling. Key questions include: Who will oversee this project? How can we ensure the communities become self-sufficient? While I cannot provide a detailed explanation right now, this is a priority for us. It reflects the sentiments of us at Haadthip—seeing our packaging floating in the ocean, even if we did not discard it ourselves, is deeply concerning. Marine waste remains one of our top focus areas.

Question 2 If the price of rubber in the South increases, will sales also rise?

Answer Rubber prices are closely tied to consumption. Many of our southern community members work in the rubber industry. Our products are considered luxury goods, so when their income rises, they tend to spend more. Conversely, when rubber prices fall, we observe a corresponding decline in consumption.

Question3 Can we sell and distribute Coke products nationwide? For instance, some products are well-received but unavailable in the central region. Is nationwide distribution possible?

Answer For new products, we collaborate with the Coca-Cola business group in Thailand, which represents the Coca-Cola brand from the United States. They conduct studies, analyze, and innovate new products and packaging for the market. Each product undergoes detailed research. However, cross-border or cross-

regional distribution is not permitted. Just as Thai Namthip cannot distribute outside its designated region, all three companies operate within their respective areas.

Question 4 If the sugar content in the product is slightly reduced, has there been any research on whether consumers notice the difference?

Answer We have been gradually adjusting the recipe for some time. However, the original recipe must remain unchanged, as some consumers can immediately detect even minor changes. Maintaining the original formula is crucial globally, but you will increasingly see low-sugar or no-sugar versions of our products.

Mr.Prawit Wirojwongchai, shareholder, commented and asked 2 questions and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer answered as follows:

Question1 According to you, when the Poonpin factory receives the new machinery, the factory in Hat Yai will close. I am curious if there will be any devaluation of the machinery. Specifically, how much more will the machine be devalued?

Answer Some machinery is undervalued by 10 million baht, particularly the glass bottle packaging machines. There are two machines in question: one that has been in use for over 50 years and another for over 40 years. Their current value is close to zero.

Question 2 There used to be a Slurpee product that sold very well, but it has since been discontinued. I would like to know whose license it was—7-11 or Coca-Cola?

Answer We had a contract with 7-11, which ended about 10 years ago due to the high investment required. Initially, sales were strong, but over time, they became inconsistent. The contract stipulated that we had to invest whenever 7-11 opened a new store and required us to provide Slurpee machines, ice makers, and drink dispensers. For each store opening, we invested approximately 1 million baht. However, if sales did not meet expectations, we had the option to terminate the contract. Currently, we only install these machines in branches with high customer traffic and profitability. We no longer install them in every branch.

Mr.Chuthana Tiyaphum, Shareholder, commented and asked a question and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer answered as follows:

Question As the executives mentioned, the company uses fresh sugarcane, not burnt sugarcane. I would like to know if the company has made any agreements with sugar companies or if there have been any proposals from them regarding this matter.

Answer We do not have the authority to enforce any requirements. However, we can discuss, request, and seek agreements with various sugar companies. 7-8 companies attended our meeting, which is a positive step. They agreed in principle that using fresh sugarcane is the right approach, but there are many limitations and challenges. The issue is not solely with the sugar factories; sugarcane farmers often prioritize short-term cost savings over long-term sustainability. Burning sugarcane reduces labor costs and makes transportation cheaper because burnt sugarcane is lighter than cut

sugarcane. However, in response to our requests, the sugar companies have started providing clear information about the source of the sugarcane they supply—whether it comes from cut sugarcane or burnt sugarcane. This is a good starting point. The next challenge is ensuring sufficient supply of fresh sugarcane, especially as other companies begin to demand it. It is unlikely that there will be enough fresh sugarcane to meet the needs of all companies. This is a collective challenge that requires collaboration. We hope that by initiating this effort and raising awareness among the Thai public, we can drive meaningful change. However, government involvement is crucial. Cutting sugarcane requires significant labor and equipment. Where will the labor come from? Where will the equipment be sourced? The government and local administrative organizations must step in to support planning and investment, as individual villagers cannot afford sugarcane cutting machines, which cost around 10 million baht per unit. This is the current situation. Despite the challenges, we will continue to urge sugar factories to find the right balance to reduce PM 2.5 emissions from burning sugarcane fields.

Mr. Thanarat Janethanyarak, Shareholder, commented and asked 3 questions and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question 1 Will there be a glass bottle option for Namthip in the future? If so, when will it be introduced?

Question 2 Is there an expectation that Schweppes will be available in glass bottles in the future?
If so, when will this begin?

Answer Regarding Question 1 and Question 2, both are part of our plans. However, the timing will need to be reconsidered once the new machinery begins operations in Quarter 4. Currently, our focus is on carbonated drinks. There are several tasks related to the production of carbonated drinks in glass bottles, including managing the entire supply chain. Rest assured, these plans are definitely in the pipeline for the future.

Question 3 Do we plan to hold shares in bottlers in other regions in the future?

Answer As of today, there are no such plans.

Mr. Narin Phothiraamsri, Shareholder commented and asked 1 question and Mr. Phongsakon Thiangtham, Director , responded as follows:

Question What is the outlook for the real estate business, and how is HTD (Hadthip Development Company Limited) performing?

Answer Currently, the first project of Hadthip Development Company Limited is in Phase 2 out of a total of 64 units. As of last year, we transferred approximately 13 units, and we expect to transfer 14 more units this year. Given the current market situation, it is widely known that the real estate sector, particularly for single-family homes or condominiums in the B segment, is facing challenges. This segment is performing less robustly compared to the A+ or high-end segments, which are doing relatively well. The primary reason for this is the stricter lending policies and higher interest rates introduced by

banks since the beginning of last year. Despite these challenges, the executives of Haadthip Development Company Limited are confident in achieving the Phase 2 targets this year. We also anticipate that Phase 3 will be completed and fully sold by 2026. This is currently our only real estate project. Although Haad Thip owns additional land that is not being utilized for business purposes, we are not experts in the real estate sector. Therefore, we need to carefully evaluate whether using this land can generate more value than leaving it idle.

Mr. Torphong Krongtraiwet, Shareholder, commented and asked 2 questions and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer answered as follows:

Question 1 Are there plans to apply for BOI (Board of Investment) privileges for the new production line? If so, can the tax rate be reduced, and what percentage would it be?

Answer For the new production line, we are unable to request support from the BOI because we are not in a supported business category. Previously, we had requested BOI privileges for plastic pellet injection, but the BOI no longer grants such privileges for this type of activity.

Question 2 Why are Schweppes Soda and Coke bottles recycled in the South produced by Thai Namthip?

Answer There may be some mixing of products. For example, wholesalers or customers who receive products from the north (Chumphon and above) might occasionally see Haad Thip products in the Thai Namthip area. However, it is important to clarify that both companies do not distribute products across districts. Any cross-district movement of products is done by customers or wholesalers independently, and we cannot prevent this.

Mr. Sittichok Boonwanich, Shareholder, commented and asked 2 questions and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question 1 For Root Beer, if we produce it in liter bottles, the cost would exceed the convenient price point for consumers. Most root beer is sold in cans.

Answer It is unlikely that we will introduce larger bottles for root beer, as the consumer base for this product is quite limited. Therefore, we do not foresee any new packaging formats for root beer in the near future.

Question 2 Regarding the issue of plastic waste on islands, some companies advertise that plastic-to-oil shredders can be used to convert plastic bottles into oil. Is this technology feasible? Could it be used to provide oil for villagers?

Answer This is an interesting idea. I am not familiar with the specifics of this technology, but PET plastic waste does have value. For Haadthip, the key is to find reliable partners to manage this waste effectively. Thailand is fortunate to have the "sa-leng" system, where junk collectors gather and sell recyclable materials. Without this system, the waste management situation would be far worse, as the current infrastructure is still insufficient. As long as waste retains value, and with proper waste management

and collaboration among producers, we can explore ways to recycle and remove waste from islands.
Regarding the conversion of plastic into oil, I will look into this further. Thank you for the suggestion.

The Meeting acknowledged the 2023 operating results, as shown in the details of the 2023 One Report and as summarized by Maj. Gen. Patchara Rattakul, Director/CEO, and Mr. Amrit Kumar Shrestha, CFO.

Since this agenda was for acknowledgement, no voting was made.

Agenda 3 To consider and approve the dividend payment for 2022 operating results

The Chairman proposed that the Meeting consider and approve of the audited financial statement ending on December 31, 2023 after having been audited and certified by the auditors from KPMG Phoomchai Audit Co., Ltd. and approved by the Audit Committee. The audited financial statement included the Company's 2022 financial status and operating results, which can be summarized as follows:

Statement of Financial Position and Statement of Loss and Profit Unit: Baht Million

Details	Companies and Subsidiaries	Companies
Total Assets	6,483.40	6,224.12
Total Liabilities	2,554.01	2,579.16
Revenue from sales	7,805.96	7,749.22
Total Revenue	7,866.46	7,893.22
Profit for the year: Owners of the parent	598.56	422.90
Earnings per share (Baht/share)	2.26	1.60

The details of the information above are given in the financial statement in the 2023 One Report, downloadable from the QR Code on the Meeting Information Form in the Enclosure No. 3.

After that, the Chairman allowed the shareholders to ask the questions. Since none of the shareholders asked any queries at this agenda, the Chairman asked the Meeting for consideration and approval.

After consideration, the Meeting resolved to approve of the Audited Financial Statement ending on December 31st, 2023 with majority votes of the shareholders who attend the meeting and cast their votes. The voting results are follows:

Resolutions of the Meeting	Numbers of Votes	Percentage
Agree	281,625,668	100.0000
Disagree	0	0.0000
Abstain from Voting	0	-
Spoilt Votes	0	0.0000
Total	281,652,668	-

N.B.: At this agenda, another 14 shareholders attended the Meeting, holding 4,744 shares in total. Therefore, this meeting was attended by 185 shareholders, holding 281,652,668 shares.

Agenda 4 To Consider and Approve of Dividend Payment for the 2023 Operating Results

The Chairman informed the Meeting of its policies of paying dividends at the rate of 50–80% of the remaining net profit after all types of reserve money have been subtracted, as specified by laws and the Company. This can be calculated from the net profit, according to the Company's consolidated income statement. However, the dividend payment depends on cash flow, investment plans, necessity and appropriateness in the future.

Based on the company's business operation results of 2023, the company had a total net profit of 598,035,462 Baht as shown on the consolidated financial statements. The company, thereby, deems it appropriate to propose to the Annual General Meeting of Shareholders to approve a dividend payment from the Company's operating results of the year 2023 at Baht 1.52 (one baht fifty-two satang) per share for a total amount of 417,997,840 Baht or 70.0% of the profit of the year on the consolidated financial statements.

The Company has already paid interim dividends for the first six-month operating results, based on the number of issued and paid-up common shares of 200,960,500 shares, of which 0.96 Baht per share for a total of 192,922,080 Baht, was paid as an interim dividend on September 8, 2023. The Extraordinary General Meeting of Shareholders No. 1/2023 approved the change in the par value of the company's shares, resulting to the issued and paid-up common shares from 200,960,500 shares to be 401,921,000 shares, effective since September 7, 2023. There is additional dividend payment for the second six-month operating results, based on the number of 401,921,000 issued and paid common shares, another share at 0.56 baht (fifty-six satang) each, totaling 225,075,760 Baht, to be determined. Such dividend payment is in compliance with the company's policy and details of the dividend payment in comparison with the previous year are as follows:

Details of Dividend Payment	Year 2023	Year 2022
Profit for the year on consolidated financial statements (million Baht)	598.04	430.98
Dividend as % of profit for the year (%)	70.00	70.00
Total dividend paid (Baht/share)	1.52	1.52
	Comprising	Comprising
	1) First interim dividend 0.96 Baht/share - The paid-up common shares: 200.96 million	1) First interim dividend 0.55 Baht/share - The paid-up common shares: 200.96 million

Details of Dividend Payment	Year 2023	Year 2022
	shares (Par value at 1.00 Baht / Share) - A total of 192.92 million Baht	shares (Par value at 1.00 Baht / Share) - A total of 110.53 million Baht
	2) Second interim dividend 0.56 Baht/share - The paid-up common shares: 401.92 million shares ^{1/} (Par value at 1.00 Baht / Share) - A total of 225.08 million Baht	2) Second interim dividend 0.97 Baht/share - The paid-up common shares: 200.96 million shares (Par value at 1.00 Baht / Share) - A total of 194.93 million Baht
Total amount of dividends paid (million Baht)	418.00	305.46

^{1/} The Extraordinary General Meeting of Shareholders No. 1/2023 approved the change in the par value of the company's shares from 1.00 Baht/share to 0.50 Baht/share, resulting to the issued and paid-up common shares from 200,960,500 shares to be 401,921,000 shares, effective since September 7, 2023.

The Board of Directors agreed to propose that the Meeting consider and approve the dividend payment from the Company's operating results of the year 2023 at Baht 1.52 (one baht fifty-five satang) per share. The company already paid the interim dividends at 0.96 Baht per share, was paid as an interim dividend on September 8, 2023 with the remaining dividend payment from the operation results of 2023 to be approved at the rate of Baht 0.56 (fifty-six satang) per share.

The Company has fixed the Record Date on which shareholders have the right to receive the dividends on Wednesday 3rd May 2024 and the dividend shall be paid on Monday 20th May 2024. However, the dividend payment is still uncertain until the shareholder's meeting to approve.

Maj. Gen. Patchara Rattakul, Director/CEO added to the Meeting as following;

Details of Dividend Payment	Year 2023	Dividend Based on Par value at Baht 0.50/share	Year 2022	Dividend Based on Par value at Baht 0.50/share
Profit for the year on consolidated financial statements (million Baht)	598.04		430.98	
Dividend as % of profit for the year (%)	70.00		70.00	
Total dividend paid (Baht/share)	1.52 Comprising	1.04	1.52 Comprising	0.76
	1) First interim dividend 0.96 Baht/share - The paid-up common shares: 200.96 million shares (Par value at 1.00 Baht / Share) A total of 192.92 million Baht	Baht 0.48/share	1) First interim dividend 0.55 Baht/share - The paid-up common shares: 200.96 million shares (Par value at 1.00 Baht / Share) A total of 110.53 million Baht	Baht 0.28/share
	2) Second interim dividend 0.56 Baht/share - The paid-up common shares: 401.92 million shares ^{1/} (Par value at 1.00 Baht / Share) A total of 225.08 million Baht	Baht 0.56/share	2) Second interim dividend 0.97 Baht/share - The paid-up common shares: 200.96 million shares (Par value at 1.00 Baht / Share) A total of 194.93 million Baht	Baht 0.49/share
Total amount of dividends paid (million Baht)	418.00		305.46	

Since we split the par value last year, to make it easier to see, the table showed that when we compare last year's figures (2022) with this year's (2023) by comparing with the same par value at baht 0.50 per share, last year's dividend

(2022) was at 0.75 baht per share, and this year's dividend (2023) is at baht 1.04 per share. Therefore, we pay more. dividend (2023) this year. The interim dividend has already been paid at baht 0.48 per share and the proposed dividend this time is baht 0.56 per share, for a total dividend payment of baht 418 million.

After that, the Chairman allowed the shareholders to ask questions. Since none of the shareholders asked any queries at this agenda, the Chairman asked the Meeting for consideration and approval.

After consideration, the Meeting resolved to approve of dividend payment for the 2023 operating results with majority of votes of the shareholders who attend the meeting and cast their votes as follows:

Resolutions of the Meeting	Number of Votes	Percentage
Agree	281,666,942	100.0000
Disagree	0	0.0000
Abstain from Voting	0	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

N.B.: At this agenda, another 6 shareholders attended the Meeting, holding 14,274 shares in total. Therefore, this meeting was attended by 191 shareholders, holding 281,666,942 shares.

Agenda 5 To consider and approve the election of directors in replacement of those who will retire by rotation

According to the Article 21 of the Company's Articles of Association, one - third of the directors must retire from office by rotation at the Annual General Meeting of Shareholder. If the number of the retiring directors is not at the one - third ratio, then the nearest shall be applied. The following 5 directors shall be retired by rotation.

- | | |
|----------------------------------|--|
| 1. Gen. Charan Kullavanijaya | Independent Director / Chairman of the Board |
| 2. Mr. Prakit Pradipasen | Independent Director / Chairman of the Audit Committee |
| 3. Mr. Yanyong Maethapanich | Independent Director / Chairman of the Nomination and
Remuneration Committee / Member of the Audit Committee /
Member of Corporate Governance and Risk Management
Committee |
| 4. Mr. Dumrongrugs Apibalsawasdi | Authorized Director / Member of the Sustainability Committee |
| 5. Mr. Pongsakorn Thiengtham | Director / Chairman of the Corporate Governance and Risk
Management Committee |

The Company had welcomed an opportunity to its shareholders to propose a list of qualified candidate(s) for directorship during November 1st, 2023 to December 31st, 2023. However, there was no any proposals of agenda nor list of candidates for considerations.

The Nomination and Remuneration (without the interested directors) has extensively discussed, thoroughly considered and agreed that the aforementioned 5 retired directors are knowledgeable, competent, qualified and have performed their duties effectively, provided useful opinions and advices to the Board and the company throughout. As for Gen. Chran Kullavanijaya, Mr. Prakit Pradipasen and Mr. Yanyong Maethapanich who have been qualified as independent director and been in this position for more than 3 terms in succession, they have experience and are expertise in the main business of the company. Moreover, Mr. Prakit Pradipasen and Mr. Yanyong Maethapanich have knowledge and are expertise in finance and accounting. Throughout their terms, they have been capable of independently providing opinions in accordance with the related procedures. As a result, the Nomination and Remuneration Committee would like the Board of Directors to propose to the Annual General Shareholders' Meeting for consideration and reelection of the 5 directors due to retire by rotation to hold the director position for one more term. Preliminary background of each director due to retire by rotation and to be reelected for one more term had been distributed to the shareholders with the Letter of Invitation, as per the Attachment 4.

The aforementioned 5 retired directors have never been penalized or terminated as a result of any malfeasance, sentenced to imprisonment for corruptions or been a partner or a shareholder of similar legal entities that compete with the company's business.

The board without any interested directors has thoroughly considered the directors' qualifications through the recruitment process and the Nomination and Remuneration Committee and agreed to propose to the Annual General Shareholders' Meeting the reelection of the 5 directors due to retire by rotation, namely Gen. Chran Kullavanijaya, Mr. Prakit Pradipasen, Mr. Yanyong Maethapanich, Mr. Dumrongrugs Apibalsawasdi and Mr. Pongsakorn Thiengtham to be re-appointed as directors.

After that, the Chairman allowed the shareholders to ask question. Since none of the shareholders asked any questions at this agenda, the Chairman asked the Meeting for consideration and resolution.

After consideration, the Meeting passed the resolution to reelect all the 5 retired Directors for another term individually by a majority votes of the shareholders who attend the meeting and cast their votes. The voting results were as follows:

1. Gen. Charan Kullavanijaya Independent Director / Chairman of the Board

Resolutions of the Meeting	Number of Votes	Percentage
Agree	272,961,248	96.9176
Disagree	8,681,194	3.0823
Abstain from Voting	24,500	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

2. Mr. Prakit Pradipasen Independent Director / Chairman of the Audit Committee

Resolutions of the Meeting	Number of Votes	Percentage
Agree	272,961,248	96.9176
Disagree	8,681,194	3.0823
Abstain from Voting	24,500	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

3. Mr. Yanyong Maethapanich: Independent Director / Chairman of the Nomination and Remuneration Committee / Member of the Audit Committee / Member of Corporate Governance and Risk Management Committee

Resolutions of the Meeting	Number of Votes	Percentage
Agree	272,961,248	96.9176
Disagree	8,681,194	3.0823
Abstain from Voting	24,500	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

4. Mr. Dumrongrugs Apibalsawasdi: Authorized Director / Member of the Sustainability Committee

Resolutions of the Meeting	Number of Votes	Percentage
Agree	279,177,848	99.1162
Disagree	2,489,094	0.8837
Abstain from Voting	0	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

5. Mr. Pongsakorn Thiengtham: Director / Chairman of the Corporate Governance and Risk Management Committee

Resolutions of the Meeting	Number of Votes	Percentage
Agree	297,117,848	99.1161
Disagree	2,489,094	0.8838
Abstain from Voting	60,000	-
Spoilt Votes	0	0.0000
Total	281,666,942	-

Agenda 6 To consider and approve the directors' remuneration and sub - committee Members' remuneration for the year 2024

The Chairman assigned Mr. Yanyong Maethapanich, Chairman of Nomination and Remuneration Committee to report to the Board. Mr. Yanyong Maethapanich, Chairman of Nomination and Remuneration Committee informed the Meeting that, in compliance with the Article 28 of the Company's Articles of Association, the directors are entitled to receive remuneration benefits from the Company. The shareholders must approve the amount of remuneration by a vote of no less than 2/3 of the shareholders' presence during the Shareholders Meeting. The amount of remuneration may be fixed, determined periodically, or remain in effect until change through a resolution of the shareholders' meeting.

The Nomination and Remuneration Committee has considered the directors' remuneration in accordance with the operating results of the Company as well as duties and responsibilities of the directors. The rate of remuneration shall be set at a level appropriately in line with other companies in the same industry and at a sufficient rate to attract and maintain highly qualified directors. The company would like the Board to the shareholders to consider and approve the 2024 remuneration for the Board of Directors and Sub-Committees comparing with rate of 2023 as follows:

1. Monetary Remuneration:

1.1 Directors' remuneration and Sub - Committee Members' remuneration

Detail	Positions	Year 2024		Year 2023	
		Remuneration (Baht/person/year)	Meeting Allowance (Baht/person/year)	Remuneration (Baht/person/year)	Meeting Allowance (Baht/person/year)
Board of Directors	Chairman	266,000	21,000	266,000	21,000
	Member	191,000	21,000	191,000	21,000
Audit Committee	Chairman	266,000	5,200	266,000	5,200
	Member	191,000	5,200	191,000	5,200
Nomination and Remuneration Committee	Chairman	42,000	5,200	42,000	5,200
	Member	21,000	5,200	21,000	5,200
Corporate Governance and Risk Management Committee	Chairman	42,000	5,200	42,000	5,200
	Member	21,000	5,200	21,000	5,200
Sustainability Committee	Chairman	42,000	5,200	42,000	5,200
	Member	21,000	5,200	21,000	5,200

2. Non - Monetary Remuneration: Directors' and Officers' Liability Insurance or D&O

3. The directors' bonus for the performance period of 2023 is proposed to be paid to the entire Board of Directors total amount not exceeding 3,990,000 Baht. The Board of Directors will pay equal payments to all directors at 285,000 Baht per person.

The board has considered, agreed with the opinions of the Nomination and Remuneration Committees and proposed to the shareholders to consider approving the remuneration for the Board of Directors and Sub - committees for the year 2024.

After that, the Chairman allowed the shareholders to ask question. Since none of the shareholders asked any questions at this agenda, the Chairman asked the Meeting for consideration and resolution.

After consideration, the Meeting resolved to approve the directors' remuneration and sub - committee Members' remuneration for the year 2024 by over two-thirds of the total votes cast by the shareholders attending the Meeting and having the right to vote as follows:

Resolutions of the Meeting	Number of Votes	Percentage
Agree	281,386,937	99.9005
Disagree	280,000	0.0994
Abstain from Voting	5	0.0000
Spoilt Votes	0	0.0000
<u>Total</u>	281,666,942	100.000

Agenda 7 To Consider the appointment of the Company's external auditors and determination of audit fee for the year 2024.

The Chairman assigned Mr. Prakit Pradipasen, Chairman of Audit Committee to report to the Meeting. Mr. Prakit Pradipasen, Chairman of Audit Committee reported that 58 of the Company's Articles of Association, an auditor must be appointed and audit fees must be determined at each Annual General Meeting of Shareholders.

The Audit Committee resolved to select KPMG Phoomchai Audit Ltd. (KPMG) to be the audit firm for the Company and its subsidiaries for the year ended December 31, 2024 as KPMG not only has performed the duties expertly but also has good reputation and performance standard, experiences and expertise in auditing, effective audit procedures and tools as well as good business understanding, and shall appoint one of the following persons to audit, review, express opinion and sign financial statements of the Company.

1. Miss. Chanarat Chanwa CPA license no. 9052
(yet to sign financial statements of the Company) or
2. Miss Chanlika Panya CPA license no. 11872

(yet to sign financial statements of the Company) or

3. Ms. Marisa Tharathornbunpakul CPA license no. 5752

(yet to sign financial statements of the Company)

The auditors named above are the same who audit the company's subsidiaries and do not have a personal relationship and/or a vested interest with the Company, its subsidiaries, management, major shareholders or other related.

Thus, it is deemed appropriate for the Board to approve audit fee for the financial statements as of 31st December 2024 in the amount of Baht 1,835,000.00 (One million eight hundred and thirty-five thousand Baht only), an increase of Baht 60,000.00 or 3.38% from 2023 as follows.

Unit: Baht

Type of Fee	Year 2024	Year 2023	Increase	%
1. Audit Fee				
- Annual audit fee	1,505,000.00	1,445,000.00	60,000.00	
- Quarterly review fee (Total 3 quarters)	330,000.00	330,000.00	-	
Total audit fee	1,835,000.00	1,775,000.00	60,000.00	3.38%
2. None - Audit Fee	- None -	- None -	-	-

The Board has agreed with the Audit Committee and proposed that the Meeting approves the appointment of either Miss. Chanarat Chanwa Registration No. 9052, or Miss Chanlika Panya, Registration No. 11872, or Miss Marisa Tharathornbunpakul, Registration No. 5752 of KPMG Phoomchai Audit Ltd. as the company's auditor for the fiscal period ended 31st December 2024. In addition, the Board has also agreed the 2024 Auditor's Fee for the auditing services of the Company's annual and quarterly financial statements in the amount of 1,835,000.00 Baht (One million eight hundred and thirty-five thousand Baht only) with no other audit fee.

After that, the Chairman allowed the shareholders to ask question. Since none of the shareholders asked any queries at this agenda, the Chairman asked the Meeting for consideration and approval.

After consideration, the Shareholders' Meeting resolved to approve the appointment of the Company's external auditors and determination of audit fee for the year 2023. by majority of total number of votes of the shareholders who attend the meeting and cast their votes. The voting results were as follows:

Resolutions of the Meeting	Number of Votes	Percentage
Agree	280,705,548	99.6595
Disagree	958,894	0.3404
Abstain from Voting	2,500	-

Agenda 8 Other Matters (if any)

At this agenda, the Chairman gave all the shareholders equal opportunities to ask queries and propose ideas fully. After that, the Chairman allowed the shareholders to ask queries.

Mr. Sittichok Boonwanich, Shareholder, commented and asked 2 comments Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer and Mr. Phongsakorn Thiangtham, Director, answered as follows:

Question 1 Earlier, I visited the company's sustainability exhibition outside. Our company is actively involved in CSR (Corporate Social Responsibility) and environmental initiatives. In addition to the oil-related presentation, we have installed solar panels. For the next phase, we plan to order more panels. If sales on a particular island are strong, we may install solar panels there to supply electricity to the villagers. However, we won't provide this for free. If business partners on the island order a significant amount of our products, we can use their credit to offset their electricity bills. If an island lacks electricity, we won't tie the support to a percentage of sales. Instead, we will provide electricity as a public utility, supporting the community. Even if the electricity grid fails or is cut off, our system will remain operational, fostering stronger community ties. We are also addressing the issue of waste on the islands. Removing garbage from the islands is challenging and expensive, so we are exploring ways to decompose it locally. Children and youth collect garbage and bring it to us. In return, we give them credit and free Coke as an incentive. This encourages environmental awareness and participation in waste management. This initiative is primarily implemented in the South, and I wanted to share this with you.

Answer by Maj. Gen. Patchara Rattakul

The idea of using solar cells is excellent, but we need to crystallize the plan first, as we cannot support every community. Regarding clean energy, we have already installed solar panels in our factories, branches, and even on delivery trucks to maximize the use of clean energy within our organization. Your suggestion to support communities is commendable. However, as a private company, we are not a government entity. We need to carefully evaluate how we can implement such initiatives. One possibility we are exploring is the use of solar-powered refrigerators. We have studied this before, but the technology is not yet stable. India is currently producing such refrigerators, and we are monitoring their progress. We believe this could help our customers reduce their electricity bills. Regarding waste collection and management, Mr. Nantiwat's sustainability department will further develop this idea. It is a great way to

raise awareness and instill a sense of responsibility in communities, from waste separation at the source to recycling. Thank you for the suggestion.

Question 2 As for the company's stock, the price has been around this level for some time. I bought Haad Thip shares during the Subprime Crisis, and the dividends have been quite high. However, the liquidity and movement of the stock are somewhat limited. I suggest issuing warrants to increase liquidity and attract more investors. If the warrants perform well, it could boost the stock price, improve the company's image, and allow us to present more products. A higher stock price would enhance the company's overall standing and expand its scope.

Answer by Mr. Phongsakon Thiangtham

Regarding the liquidity of Haad Thip's shares, over the past 5 years, there has been a significant increase in trading activity, and the stock price has also risen considerably due to the company's improved performance.

As for issuing warrants, this depends on whether the company needs to raise funds for future plans. Currently, we do not have any immediate plans that require substantial funding, so issuing warrants is not a priority. However, warrants could be an option in the future if the need arises. To improve liquidity, we are focusing on strengthening Investor Relations. We are engaging more with both institutional and retail investors through meetings and business visits. Over the past 3-4 years, many brokerage firms have started writing research reports about our company, which has helped increase liquidity. However, our business performance must remain strong to keep investors interested.

Mr. Sittichai Latloy, Shareholder commented and asked a question and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question What are the current positive and negative factors affecting the company's operations?

Answer The positive factors for our current business operations include the economic recovery, greater political stability, and increased consumption, driven by effective marketing strategies and excellent market service from the Haad Thip team. On the other hand, the negative factors are the rising costs of our main raw materials, such as sugar, aluminum cans, and plastic pellets. While oil prices have started to decline, plastic pellet prices remain dependent on oil prices. We have clearly felt the negative impact of rising sugar costs since November last year, even though we have not increased our product prices. Additionally, aluminum prices are also trending upward. These rising costs are significant headwinds and will pose challenges to our operations this year.

Mr. Pakpoom Suksumwat, Shareholder, commented and asked a question and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question Can the ticker symbol for trading be changed from HTC to COKE? The registered name would remain Haad Thip Company, as the current ticker may not clearly reflect the company's identity. It might be confused with other companies, such as those in the communications sector. Additionally,

Coke is the product that Haad Thip sells the most. I request Haad Thip executives to consider this proposal.

Answer Thank you, Mr. Pakpoom, for this interesting suggestion. The former CEO dedicated himself to Haad Thip Company for many years and led the company into the stock market. While your proposal is thoughtful, I remain confident that Haad Thip is well-respected by our southern community, the Thai people, and investors. Over the past 50 years, we have built a strong reputation and are beloved by those around us. The ticker HTC symbolizes our commitment to giving our heart to consumers and customers—Heart to Consumer, Heart to Customer.

Mr. Wiran Chimkul, shareholder, commented and asked 3 questions and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer answered as follows:

Question 1 If the demand for products in the market this year exceeds the company's expectations, what is the company's production capacity, and what are the plans to adjust logistics and packaging?

Answer Our business strategy is to always invest one step ahead of demand. This is the core of our operations as a Coca-Cola business. We continuously invest to ensure we are prepared. As seen in the slides, our current utilization rate is around 60%, meaning we have significant production capacity available. Regarding logistics, we have no issues. We operate a fleet of over 600-700 vehicles, including 200 sales vehicles and 100 transport vehicles (excluding outsourced vehicles). We are always ready to serve our customers and consumers efficiently.

Question 2 Are there any plans to launch new sugar-free products this year?

Answer Yes, new products in the sugar-free category are definitely in the pipeline. However, we cannot disclose specific details at this time to avoid giving competitors an advantage.

Question 3 Does the company have plans to develop an organizational culture that emphasizes agility?

Answer Thank you, Wiran, for raising this important point. Agility and adaptability have been critical to our survival during COVID. A key part of this is having a workforce that is young, modern, and tech-savvy. This shift is also tied to changing our organizational culture. For example, we no longer focus on traditional metrics like punch cards or physical presence. Instead, we prioritize measurable results. Our gym at Haad Thip is open 24 hours, and we emphasize flexibility in working hours while ensuring productivity and accountability. This cultural change aligns with the evolving needs of society, and we will continue to emphasize agility moving forward.

Ms. Jinda Lakchaimongkol, shareholder, commented and asked a question and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer answered as follows:

Question Are there any concerns for the company this year?

Answer Our primary concern is the rising cost of raw materials and utilities, which are influenced by global economic trends. Beyond this, we are well-prepared for other challenges, such as natural disasters,

which we face annually in the South. Having operated in this region for decades, we are accustomed to such events. Raw material costs remain our main focus.

Mr. Kasidit Ployngam, Shareholder, commented and asked a question and Maj. Gen. Patchara Rattakul, Director /Chief Executive Officer responded as follows:

Question Is there a policy to install freezers that can make jelly or turn drinks into shaved ice? I tried this and found it very refreshing, as it enhances the drink's appeal.

.Answer We experimented with this type of machine in the past, but it was not very successful. Currently, we have no plans to use -4°C freezers. While we may revisit this idea in the future, there are no immediate plans to reintroduce it.

Gen. Charan Kullavanijaya, Independent Director and Chairman of the Board, presiding over the meeting, addressed the attendees:

I would like to express my sincere gratitude to everyone, both those present in this room and those joining via electronic media, for your continued trust in our company and for your support throughout the year. I assure you that our company remains committed to operating with morality, ethics, honesty, and integrity for the benefit of society and the nation. I also extend my appreciation to all shareholders for your unwavering support. In addition to those attending today's meeting, I would like to thank the volunteer representatives for shareholder rights protection for their participation. Thank you once again, and I wish you all success and prosperity throughout the year. I look forward to seeing you at the next general meeting. With that, I hereby declare the meeting closed.

The host summarized the Care the Bear Project. At this Shareholders' Meeting, the amount of carbon footprint or global warming could be reduced by 1,523.17 kilograms carbon dioxide equivalent, equaling CO₂ absorption by 169 trees.

The Meeting was adjourned at 17:03 hrs.
